The following is an examiner's statement of reasons for allowance:

With respect to claims 1-2, the prior art alone or in combination does not teach the limitation of a activated carbon having a hard-to-graphitize material with water vapor that a median particle size within a range from 4 μm to 8 μm in the particle size distribution as measured by a laser diffraction method and a benzene adsorption ratio is within a range form 47% to 60% by weight of activated carbon.

With respect to claims 2-3, the prior art alone or in combination does not teach the limitation of a activated carbon having a hard-to-graphitize material with water vapor, wherein the activated carbon has a content of calcined ash of not more than 0.2% by weight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
